Muhammad

Cloud & DevOps | AWS Certified (SAA) | Terraform & Kubernetes

Email: matta5292@gmail.com | Mobile: +966506152420 | GitHub | LinkedIn | Portfolio |
Location: Jeddah, Saudi Arabia (Ready to relocate)

PROFESSIONAL SUMMARY

AWS Certified Solutions Architect Associate and Computer Science graduate with hands-on experience building cloud-native infrastructure on AWS using Kubernetes, Terraform, Docker, and GitHub Actions. Skilled in CI/CD automation, Infrastructure as Code, Linux administration, observability, and cloud security. Passionate about DevOps, scalable distributed systems, and platform engineering. Bilingual in English and Arabic.

SKILLS

- **Cloud Platforms:** AWS (EC2, S3, EKS, ECS, Lambda, CloudFront, Route 53, VPC), Azure (VM Management, Networking).
- **Containerization & Orchestration:** Docker, Kubernetes, Amazon EKS, Helm.
- **DevOps & CI/CD:** GitHub Actions, ArgoCD, GitOps Workflows, CI/CD Pipeline Automation.
- **Infrastructure as Code:** Terraform.
- **Security & Networking:** Cloudflare Tunnel, Zero Trust Architecture, SSH Hardening, UFW Firewall, Fail2Ban, Linux Security, IAM, OIDC Federation.
- **Monitoring & Observability**: Prometheus, Grafana, AWS CloudWatch.
- **Programming & Automation:** Python, Go, Bash.
- **Operating Systems:** Linux(Ubuntu).

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03) | View Credential
Amazon Web Services | Score: 835/1000

TECHNICAL PROJECTS

Cloud-Native Go Microservice Platform | GitHub Repository **May 2026**

- Engineered and deployed a cloud-native Golang microservice on Amazon EKS using Kubernetes, Docker, Helm, and scalable container orchestration practices.
- Automated Infrastructure as Code (Terraform), secure GitHub Actions CI/CD with AWS IAM OIDC federation, and observability using Prometheus and Grafana.

Secure Containerized Infrastructure | GitHub Repository **November 2025**

- Deployed secure containerized workloads with Cloudflare Tunnel, SSH hardening, UFW, and Fail2Ban.
- Automated Linux infrastructure setup and security configuration using Bash scripting.

AWS EKS Microservices Platform | GitHub Repository **May 2025**

- Built Kubernetes infrastructure on AWS EKS using Terraform, reducing manual deployment effort by ~60%.
- Implemented GitOps workflows with ArgoCD for automated deployments and improved deployment consistency.

PROFESSIONAL EXPERIENCE

Cloud Admin & AI Automation | TechWorks
Oct 2025 – Dec 2025

- **Cloud Admin:** Managed Azure Linux VMs, ensuring high availability via proactive monitoring and automated security patching.
- **Automation:** Deployed n8n workflows to integrate APIs and automate repetitive tasks, improving team operational efficiency.
- **Security:** Hardened infrastructure using Bash scripting, UFW configuration, and SSH management in a multi-cloud environment.

EDUCATION

University of the Punjab – BSc (Hons) Computer Science
Dec 2021 – Jul 2025

- **Relevant coursework:** Functional & Object Oriented Programming, Data Structures and Algorithms, Information Security, Computer Networks.

LANGUAGES

• **Arabic:** Professional Fluency • **English:** Professional Fluency
